LocalMaps 3.2.5 Release notes

Bug fixes:

Viewer:

- Fix for sign-in prompts after switching tabs when SSO is configured.

Administration:

- Azure SQL databases can be connected as a data source now.
- Custom db schemas are now supported and works fine.
- Connecting to encrypted SQL Server works, and SSL mode works for both mysql or postgres.

New features:

- Google Analytics can be configured for Gallery and Viewer.
- Buffer is now included with Draw/Measure.

Feedback addressed from the users:

- Header stays in the select widget while the layer list is scrolled through.
- Turning a child layer on will turn on the parent layer.
