

LocalMaps 3.2.8 Release notes

This patch has some significant improvements. It is highly recommended that this patch is applied to all your existing 3.2x instances.

Fixes:

- Switch map now loads all the maps in the initial click.
- Reporting
 - Update web map Json button now detects map changes and updates.
 - Save button in the report creation now works fine when switching between base layer sources.
- Draw/Measure
 - Editing text created from draw/measure now works.
 - Draw/measure sliders and number pickers no longer dip into floating points now and again.

New additions:

- LINZ ArcGIS server can now be added as a data provider.
- Reporting now have an option to access data sources anonymously.

[Access Report Source Layer Anonymously](#) ⓘ

Note: Enable this only when table queries fail due to a public only report source. May disrupt report setup if enabled incorrectly.
